

Slack Feedback by Theme (Sep 2024 - Mar 2026)

Conveyor | Customer Feedback from Slack

Here is the result of "view" for the Page with URL <https://www.notion.so/321bc34a95a18108b879fb7514a78659> as of 2026-03-25T20:34:48.342Z:

This page was written by Claude. Haley used Cowork to scrape slack for customer feedback that may have been lost or missed over time to create this page for reference as part of future planning. Some of these items may: have already been addressed, be misinterpreted, or be fully valid. Please take with a grain of salt and verify!

This page compiles product feedback on Conveyor's Trust Center gathered from Slack over the last 1.5 years (September 2024 – March 2026). Sources include customers, prospects, and internal team members. Feedback is organized into 10 themes.

1. AI Agent Speed & Performance

Response time is the most frequently raised issue with the Trust Center AI Agent. Customers and internal team members consistently flag that the agent feels slow, impacting perceived quality and adoption.

- <<>>P50 response time of ~15s, minimum 6.77s<<<EB>>> — Phillip Graham flagged detailed timing data in December 2025. → Slack
- <<>>"Tens of seconds" to retrieve docs<<<EB>>> — Anner flagged this as a concern in March 2026. → Slack
- <<>>Nick @ Workday: 30s felt slow; 15s would be "very reasonable"<<<EB>>> — November 2025 pilot feedback. → Slack
- <<>>"Painfully slow" — impacting adoption<<<EB>>> — chris noted this in January 2026. → Slack
- <<>>Root cause: agent re-initialization per request<<<EB>>> — Albert explained this is done for security reasons (November 2025). → Slack

2. AI Agent Content, Quality & Customization

Customers want more control over what the agent says and how it presents information, including custom disclaimers, fallback messages, and smarter content scoping.

- <<>>Custom disclaimer text<<<EB>>> — Requested by Alteryx/Leanna, Notion, and Instructure/Gary. → Slack
- <<>>Gary @ Instructure: customize end-of-answer fallback message and disclaimer text<<<EB>>> — also wants agent to access announcements and subprocessors content. → Slack
- <<>>Product line selector UX issue<<<EB>>> — agent incorrectly warns that info may not apply even when all product lines are selected. → Slack
- <<>>AI attribution label needed<<<EB>>> — Notion requested an "answered with Conveyor AI" label in Trust Center agent responses. → Slack

- <<>>Nick @ Workday: surface region/team-specific doc recommendations<<<EB>>> — agent should tailor recommendations by team or region. → Slack
-

3. Document Management & Permissions

Customers need more granular control over what users can view vs. download, and want better in-browser document viewing for non-PDF formats.

- <<>>Pega Systems: separate view vs. download permissions per role for the same document<<<EB>>> — Laura flagged this in March 2026. → Slack
 - <<>>Pega Systems: CSV/Excel docs should be viewable inline (like PDFs) without requiring download<<<EB>>> — also March 2026. → Slack
 - <<>>HubSpot: complex internal role permission needs<<<EB>>> — specific requirements around who can view vs. download protected docs (February 2026). → Slack
 - <<>>Splunk: custom watermark text<<<EB>>> — wants "SPLUNK CONFIDENTIAL - NDA REQUIRED" watermark (November 2025). → Slack
 - <<>>File upload limit bug<<<EB>>> — default 1MB cap was too low; fixed to 10MB (Instructure/Workday-related). → Slack
 - <<>>Multi-line document title spacing bug on Mediacore<<<EB>>> — Phillip flagged visual layout issue on prod/staging (March 2026). → Slack
-

4. NDA / Access Gating

Customers and prospects encounter friction in the NDA and access gating flow, and internal teams need better tooling to manage access requests.

- <<>>Hootsuite: internal users incorrectly gated for NDA<<<EB>>> — September 2025. → Slack
 - <<>>Notion (Tomas): routed to Trust Center when trying to access a questionnaire link<<<EB>>> — confused by the access model (March 2026). → Slack
 - <<>>CoreWeave: needs notes/status field on Customer Trust Center access requests<<<EB>>> — for team visibility and handoff (March 2026). → Slack · Critical feature request bot
-

5. Analytics & Reporting

Customers want more accurate, granular, and actionable analytics from the Trust Center — and some are already building sophisticated workflows on top of the data.

- <<>>Visitor count discrepancy<<<EB>>> — numbers inflated by anonymous/bot IPs (flagged by Splunk and HubSpot, March 2026). → Slack
- <<>>Splunk: analytics API data doesn't match Conveyor dashboard visitor count<<<EB>>> — October 2025. → Slack
- <<>>Notion: requests weekly Looker push of customer feedback<<<EB>>> — March 2026. → Slack
- <<>>Document engagement-to-revenue correlation<<<EB>>> — Taylor Goodman requested this (February 2026). → Slack
- <<>>Gary @ Instructure: wants analytics dashboard and thumbs up/down data visibility.<<<EB>>> → Slack

- <<>>Qualtrics (Jackie): using unanswered questions export to generate AI trend analysis for the business<<<EB>>> — praised as a standout use case (March 2026). → Slack
 - <<>>Greenhouse: average response time metric added to TC Agent usage report<<<EB>>> based on their feedback. → Slack
-

6. Automation & Innovation Pace

Key accounts — especially Notion — are asking for deeper automation capabilities and expressing concern that Conveyor isn't moving fast enough relative to competitors.

- <<>>Notion (Ryo, Cole): perception that Conveyor is less innovative than competition<<<EB>>> — March 2026. → Slack
 - <<>>Cole's detailed 5-step Slack-native questionnaire automation workflow request<<<EB>>> — wants end-to-end automated process triggered from Slack. → Slack
 - <<>>Notion: wants Slack-native questionnaire submission workflow demo<<<EB>>> — March 2026. → Slack
 - <<>>Broader signal<<<EB>>>: demand for low/no-touch automation is a consistent theme among enterprise Trust Center customers.
-

7. Branding & Customization

Enterprise customers want more control over Trust Center branding — including fonts, colors, and AI bot appearance.

- <<>>Johnson Controls: repeatedly adding custom font<<<EB>>> — multiple Zapier notifications (March 2026).
 - <<>>Brand color customization on email buttons<<<EB>>> — punted from V1 NDA emails; Ivana noted the gap (December 2025). → Slack
 - <<>>Zendesk: feedback on Trust Center designer/configuration<<<EB>>> during launch (August 2025). → Slack
 - <<>>AWS Trust Center revamp noted as enterprise branding benchmark<<<EB>>> — Joe flagged as a competitive reference (August 2025). → Slack
 - <<>>Ivana design exploration: AI bot name/color customization<<<EB>>> to match vendor branding. → Slack
-

8. Positive Feedback

Several customers expressed strong enthusiasm for the Trust Center AI Agent experience.

- <<>>Nick @ Workday: "This is such a better experience than what we have today"<<<EB>>> — loves AI chat over manual security package prep. → Slack
 - <<>>Gary @ Instructure: "I really love it... good responses, reasonably quick return time, intuitive. Nice UI."<<<EB>>> Setup was a "total breeze." → Slack
 - <<>>Qualtrics: TC agent data used for AI trend analysis<<<EB>>> — internal team called it a "GREAT outcome." → Slack
-

9. Internal UX / Admin Experience

Internal Conveyor users and admins at customer companies have flagged UX gaps in the admin-side experience.

- <<>>TC agent review notifications are confusing<<<EB>>> — Joe Veroneau (internal) noted you can only review answers in a Slack modal, not in the Conveyor app directly (March 2026). → Slack
 - <<>>Subprocessor list functionality "leaves quite a bit to be desired"<<<EB>>> — no access group or NDA gating option available. → Slack
 - <<>>Gary @ Instructure: wants "Download All" button for subprocessors<<<EB>>> to export as a spreadsheet or PDF. → Slack
-

10. Churn Risk & Platform Complexity

A handful of accounts have cited Trust Center or KB maintenance burden, reliability issues, or competitor alternatives as churn signals.

- <<>>H&S churn: KB and TC maintenance greater than anticipated<<<EB>>> — browser plugin unreliable for portal questionnaires (February 2026). → Slack
 - <<>>1Password: SOC 2 gated but TC engagement hasn't increased<<<EB>>> — concern about moving to Drata/Vanta (June 2025). → Slack
 - <<>>Clari/SalesLoft expansion: testing Safebase; CISO connected to Drata<<<EB>>> — flagged as competitive risk (March 2026). → Slack
-
