

Trust Center Vision Sprint

Conveyor TrustUs League | Q2 2026 Planning

Here is the result of "view" for the Page with URL <https://www.notion.so/32dbc34a95a181fb9f95e679ec0959bf> as of 2026-03-25T21:05:17.095Z:

We have <<>>one quarter<<<EB>>> of dedicated TC development left. SafeBase is getting absorbed into Drata, Vanta's TC is a bolt-on, and no one has nailed the buyer experience. We have a real window - this sprint is where we decide how to use it.

<<>>MISSION:<<<EB>>> Identify the highest-leverage bets that differentiate the Conveyor Trust Center in the market, and leave with a focused Q2 build plan and rough prototypes of the top concepts. Every decision should pass the test: <<<I>>>"Is this the best use of our one quarter?"<<<EI>>>

Structure

<<>>Pework (shared March 25–26, due by Monday March 31)<<<EB>>> — Async. Read the context materials, form your own point of view, start sketching ideas.

<<>>Day 1: Build <<<EB>>>(Tuesday, April 1)** **Everyone independently explores and prototypes ideas in parallel. Vibe code, sketch, build — make something you can show.

<<>>Day 2: Show & Discuss <<<EB>>>(Wednesday, April 2) Show & tell, react to each other's ideas, find themes, and debate the tradeoffs. Let the ideas breathe.

<<>>Day 3: Converge & Decide <<<EB>>>(Thursday, April 3) Make the hard calls. Lock the bets, size the scope, and walk away with a Q2 build plan.

Who

<<>>Core TrustUs League leads:<<<EB>>> Haley, Ivana, Nadim

<<>>Extended team:<<<EB>>> Chris, Anner, Sydney

Everyone must do the pre-work and participate in the building exercises. The goal here is that we all come together with equal context and on equal footing for these sessions. Also the intention is that leadership goes deep early in the quarter so they can then feel comfortable to step back and let the squad take the lead for the remainder of the time.

Constraints to Keep in Mind

- ~1 quarter of TC development appetite remaining. We're picking bets, not building a multi-quarter roadmap
- Staging is part of the work but there are levels we can build for this, and we can right-size it to fit what we need
- Above the fold work is designed but not yet shipped, we will lean on design testing feedback, not live data
- It's OK to dream big on Day 1. Day 3 is where we get ruthless about what actually fits.

Pre-work

Absorb the materials below at your own pace between now and Monday March 31 to help us start out with shared context and understanding. Any additional materials that you think will be helpful for shared understanding and the

best possible end result, please share in our group slack <https://conveyor-group.slack.com/archives/C0ANU3VN9QW>
Come to Day 1 ready to build and collaborate! ■

<<>>Read<<<EB>>>

I've done my best to curate these in a logical order so start at the top and proceed from there!

- Q2 Goals - figjam from our goal setting workshops. Please remind yourself of our <<<I>>>spiritually aligned goals<<<EI>>><<<I>>>.<<<EI>>> And note that we will set true SMART goals from these after we complete this Q2 alignment exercise!
- <mention-page url="https://www.notion.so/325bc34a95a181dba4aaebb23fe03f47"/> - objectives and early draft success metrics (note: metrics to be revisited after this workshop)
- Trust Center Brainstorm Figjam - there is a LOT in this figjam, please take plenty of time to take it in and absorb each of the sections. This workshop was completed a month or two back but will still be largely valid! What this contains:
 - Visitor user persona definition & jobs to be done
 - Current Conveyor TC state vs ideal state
 - Competitor capabilities & reference image
 - Ideal vision jam board
- <mention-page url="https://www.notion.so/2d1bc34a95a180ab9ec6e32bb384ca34"/> - early planning doc for this exercise, contains feature gaps, customer feedback
- <mention-page url="https://www.notion.so/321bc34a95a1802885e8fce72bfce284"/> - feature comparison, positioning, market gaps
- <mention-page url="https://www.notion.so/2d2bc34a95a1805daf94c02af6f6307f"/> - includes descoped items and rationale. A lot of this work can inform where we go next so take some time reviewing this as well as the research takeaways linked below:
- <https://www.figma.com/board/nagsqwxkeU1Z0NAUOxJQ0y/Card-Sorting--Trust-Center-Changes?node-id=59-1082&p=f&t=4f4vcw25RCIDqzFk-0>

If you're feeling <<<I>>>really<<<EI>>> engaged and want to listen to these or look at the transcripts. Each of these notion pages links to the gong:

- Please take a skim/scan through the following:
- <mention-page url="https://www.notion.so/1a8bc34a95a180318e4cc28f763f3092"/> - TC specific view of customer submitted feature requests
- <mention-page url="https://www.notion.so/321bc34a95a18108b879fb7514a78659"/> - feedback scraped from Slack using Claude

Below are included for additional reading / context if you want to dig in further but are definitely optional.

- Some areas of particular feedback:
- Organization of content: (see "content management" in <mention-page url="https://www.notion.so/1a8bc34a95a180318e4cc28f763f3092"/>)
- Reorganization of documents
- How documents appear on the TC
- <mention-page url="https://www.notion.so/311bc34a95a180618b8ef9fbc6bd19d1"/>
- Legal language <mention-page url="https://www.notion.so/2febc34a95a1802f98dcd8ceb15a10de"/>
- <mention-page url="https://www.notion.so/2febc34a95a1809e89f7cee4d5f53537"/>
- <mention-page url="https://www.notion.so/2febc34a95a180f7a38ef388fb9549dc"/>

- Looker performance/adoption dashboards:
- Internal adoption dashboard
- Customer reporting
- Feel free to look through the many items in [TrustUs League Notes](https://www.notion.so/26bbc34a95a1801ab0fad5a6631eb79e) as many capture research, interview notes, etc. Very old items are moved out of this view using the “archive” status to keep the list fairly fresh.

Other useful items (optional reference)

Bring Ideas

- Your top 3 “if we could only do 3 things this quarter” ideas. (Feel free to start thinking in terms of “if we could do anything”.) Be bold.
- A sense of what you want to prototype on Day 1.

Agenda

Day 1: Build

We'll start the day with a kickoff, quick level set on our North Star Vision and Q2 goals then a quick round-the-room on what everyone is planning to explore or dive into and what they found most interesting in the prework.

For today, everyone works independently, in parallel. Follow your instincts. Make something showable, not something perfect. These can be full AI prototypes, storyboards, combinations of artifacts.

Day 2: Show & Discuss

The goal for the day is to share what has been built, react, and let the ideas cross-pollinate. We are not forcing any decisions! Our goal is to understand the full landscape of ideas and discuss what people built and why.

General agenda for the day will be:

- Show and tell session: each person showcases their idea for 10-15 minutes, shares what they built and why and what they got most excited about
- General discussion:
- What did we find most interesting?
- What themes or patterns emerged?
- Where did people converge with each other independently?
- Where were there genuine disagreements or opposing directions?
- What tradeoffs are starting to become apparent?
- Debate: This will likely happen naturally but we'll transition into deeper discussion on the areas that sparked the most excitement or energy or where there was the most tension.
- What's the impact of items
- What's the feasibility
- Are they differentiators or just closing gaps
- Overnight “homework” after this day - every person should write down their revised top 3 bets after seeing all the ideas and discussing. Sleep on it and come to day 3 ready to pare down and commit.

Day 3: Converge

Look at all our ideas with fresh eyes. Make the hard calls. Gather alignment as a group on our plan for Q2.

- <<>>Revised top 3s<<<EB>>>: where are everyone's heads at after sleeping on it? Where did your thinking shift from the pre-work to now?
- <<>>Time for hard choices: <<<EB>>>
- Force ranking by impact x feasibility (possibly impact, confidence, feasibility)
- Sizing and sequencing - will our top 3-5 bets fit (including staging)
- Explicitly capture what we are not going to do and why
- <<>>Wrap & next steps<<<EB>>>
- Lock in our decisions and document
- Everyone shares their prototype artifacts
- Capture any follow up actions needed

What We Leave With

1. <<>>Shared conviction on the bet(s)<<<EB>>> for Q2 — what we're building and why
2. <<>>Rough prototypes<<<EB>>> from Day 1 that bring the top ideas to life
3. <<>>A focused Q2 scope<<<EB>>> sized to fit the quarter, with sequencing and dependencies
4. <<>>A map of what we explored and what we cut<<<EB>>> — useful context for the future
